Vegetable / Plant Knife is used to cut the fruit of the plant (specially greenhouse plants).

This knife avoids infections between the plants thanks to the chemical liquid of the interior of the knife flowing out from the container

1. High carbon SK5 steel blade
2. Two holes beside the cutting blade
3. Two holes inside the head tube
   (3. and 2. are two passages that liquid can flow through)
4. Two Plugs
5. Stuff one plug into one of holes inside tube if you want less liquid flow
6. Stuff two plugs to stop the liquid flowing out.
7. Plastic container for chemical liquid Capacity:35 cc

2 in 1 Weeder & Cutter

Blades: Stainless steel
Handle: PP handles
Packing: Tie on Card, 12/48/CTN, 2.4', 7.5/8.5kgs

Using hand to pull out the weeds = Dirt + Inefficiency

Pull out the weeds Cleanly, Quickly, Efficiently!!

Traditionally we use finger to pull out the weeds. It's hard to move whole piece of weed, and the roots stay in the ground still. Importantly, the finger gets dirty and the dust gets into the nail. It's difficult to wash it clean. The finger skin is injured easily!

Our NEW Product – "2 in 1 Weeder & Cutter". It pulls out the weeds easily, cleanly, efficiently!!
Meantime, the cutter allows your gardening work anytime!
